Smoke so bad you couldn't see the mountains on either side of the valley most of the time. Was doubly tough on the iron sight shooters, as you could actually see the gray haze on the targets, so that through the peep I'm sure definition of the target outline was poor at best! Match started out at near dead calm, then came a very gentle left to right, then right to left, increasing in intensity and speed of switching back and forth until the last relays, when it was switching almost every shot. Still fairly gentle, but definitely challenging for the spotters and the shooters! Probably got near 100 degrees, but somehow didn't seem so bad as compared to all the smoke, and with only half the targets set, the work load was more tolerable.

Jim and Daniel had some of their finest shooting in a long time ... but what about those chickens guys?

Sure hope to have it much nicer for everybody next month!!!
